Yudhveer Singh Panwar

yudhveerp10@gmail.com | LinkedIn | Github | Leetcode | Delhi, India

Summary

Student at Vivekananda Institute of Professional Studies-Technical Campus, New Delhi pursuing B.Tech in AI & Data Science with hands-on experience in **Python, C++, SQL, Development, and big data tools such as Hadoop**. **Proficient in data analysis, machine learning, and Data Science**. Led social media initiatives for sustainability campaigns and **managed TEDx event collaborations**. Interested in developing tech solutions to solve real-world problems.

Technical Skills

Languages: Python, SQL, C++, C#, Java

Databases: SQL, NoSQL, MongoDB, Firebase

Libraries & Frameworks: TensorFlow, Flask, Pandas, OpenCV, Flutter

Tools & Technologies: Jupyter Notebook, VS Code, GitHub, Power BI

Soft Skills: Team Collaboration, Content Strategy, Event Management, Communication, Leadership

Education

Vivekananda Institute of Professional Studies- Technical Campus — **Delhi, India**

*Bachelor of Engineering in Artificial Intelligence and Data Science (**8.7 CGPA**)* — *2022 – Present*

Experience

PaisaLo Digital Limited — **July 2025 – Aug 2025**

Python Developer - Internship — *Delhi, India*

- Implementing internal workflows automation through **Python and libraries like Pandas, Numpy, OCR, and Requests.**
- Create backend scripts for scheduling tasks and data conversion.
- Performed API integration tasks and debugging pipelines to make the system run faster.

TedxVips — **April 2025 – Sep 2025**

Core Team'25 — *VIPs-TC*

- **Coordinating collaborations** and vendor partnerships for TedxVips 2025.
- Assisting in logistics, venue setup, and audience experience optimization.
- Supporting planning and execution of speaker onboarding and main event strategy.

C.O.D.E Technical Society (VSE&T) — **Aug 2024 – March 2025**

Head Of Content (Core Team) — *VIPs-TC*

- Led content development around emerging technologies such as AI, Cloud and Blockchain.
- Drafted and edited technical blogs, session summaries, and event announcements.
- Supervised a content team and collaborated with the design and outreach departments.

Coltri Marthub — **July 2024 – Aug 2024**

Technical Intern — *Remote*

- Supported tech and research teams in streamlining workflow processes.
- Assisted with organizing project files, spreadsheets, and technical documentation.
- Explored automation and emerging tools, participated in brainstorming workshops and tech presentations.

Projects

Tomato Plant Disease Detection | Deep Learning (CNN), Python, TensorFlow — **Github Link**

- Developed a deep learning model using Convolution Neural Networks to classify disease in tomato leaves.
- Trained on diverse image datasets for accurate early-stage disease detection, Integrated that model with a basic web interface for real time diagnosis.

Covid-19 Analysis Dashboard | Power BI, Python, Pandas

- Designed an interactive Power BI dashboard to visualize COVID-19 trends across Indian States
- Incorporated drill down capabilities and dynamic filters for comparative analysis.

Diabetes Prediction Using GAN | Python, GAN, Flask

- Developed a web app that predicts diabetes risk based on user inputs.
- Used Generative Adversarial Networks (GANs) to synthesize additional training data.

Biometric Authentication System | Python, OpenCV, Flask/FastAPI. — **Github Link**

- Designed a secure authentication prototype integrating **face recognition, active liveness detection** (blink & head-movement), and **Aadhaar-based verification**.
- Developed an interactive **frontend (HTML, CSS, JS, WebRTC)** for real-time camera access.
